

Timothy L. Smith, MD, MPH

**Candidate for
Director at Large
Academic**

Given the uncertainty of today's healthcare environment, what do you perceive as challenges and possible solutions to implementing the Academy's strategic plan?

The AAO-HNS strategic plan outlines priorities and specific goals including: Advocacy, Research and Quality, Education and Knowledge, Member Engagement and Unity, and Sustainability. Clearly, each of these is essential to our specialty's ongoing health. Limited by 200 words, I'd like to focus on challenges and opportunities in **Membership Engagement and Unity**. This priority is imperative for the others to succeed.

The broad scope of our relatively small specialty makes it ripe for fragmentation, which can lead not only to disengagement, but also to internal competition and a vicious cycle with predictable consequences. We are increasingly pulled in different directions; consistent involvement in our Academy's mission and strategic plan is challenging. Therefore, the Academy must strive to be a central unifying force for our specialty. But that alone is insufficient; membership in the Academy must add substantial value to our professional lives. *ENTConnect*, the electronic open forum digest, is one excellent example of recent Academy efforts to consistently engage the membership through an interactive medium. If given the opportunity to serve, my term on the Board would be dedicated to continually advancing efforts towards membership engagement, increasing the value of membership, and specialty unity. Thank you.

It is a true honor to be nominated for this position and I am very motivated to make a difference, if elected.

I remain highly engaged, up-to-date, and interested in Academy affairs and their impact on the practicing clinicians in otolaryngology. I firmly believe that our Academy needs active clinicians to take time from their practices and their families to help set the Academy agenda and to advance the Academy's mission. Serving on the Board of Directors is a unique opportunity to give back to our specialty.

I have sought opportunity to participate in the Academy at several levels throughout my career. Participation in CORE, the Task Force on New Materials, and the Home Study Course were highlights early in my career. These experiences led to my opportunity to help develop many Academy initiatives in evidenced-based otolaryngology. As a result, I have contributed to the Academy efforts on clinical practice guidelines and as a liaison between the American Rhinologic Society, where I recently served as President, and the Academy on several coding and reimbursement issues.

CURRICULUM VITAE

Date 12/03/14

Name Timothy L. Smith, MD, MPH, FACS

Current Employment

Professor, Department of Otolaryngology – Head and Neck Surgery
Oregon Health and Science University, Portland, Oregon

Place of Birth Morgantown, W Va.

Education:

Undergraduate School 1984 – 1987	Bachelor of Science, Biology degree University of Cincinnati
Medical School 1987 – 1991	Medical Doctor degree University of Cincinnati College of Medicine
Graduate Degree 1996 – 1998	Master of Public Health degree Department of Health Policy, Finance and Administration University of North Carolina School of Public Health

Residency and Fellowship

Residency Training 1992 – 1996	Otolaryngology - Head and Neck Surgery University of North Carolina School of Medicine
Fellowship Training 1999	Rhinology and Sinus Surgery Medical College of Wisconsin

Specialty Rhinology and Sinus/Skull Base Surgery

Licensure and Certification

Diplomat of the American Board of Otolaryngology	04/97	
Diplomat of the National Board of Medical Examiners	06/92
