

Why should you invest in Reg-ent?

2,000+

clinicians contributing data
from 400+ practices

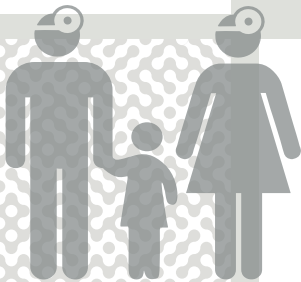

Reg-entSM

ENT CLINICAL DATA REGISTRY

Reg-ent serves as the first national otolaryngology-specific data repository that will provide a platform for research within the specialty.

5 million
unique
patients

22
specialty-specific
measures

11 million
total patient
visits

Reg-ent harnesses the power of data to guide the best ENT care.

ENT CLINICAL DATA REGISTRY

Measures Beyond MIPS

The 22 otolaryngology-specific quality measures available in Reg-ent were not developed solely for MIPS reporting but rather were developed to **provide a way to measure both the quality of care and outcomes of patients across the specialty of otolaryngology.**

The measures in Reg-ent, as displayed on provider and practice Reg-ent dashboards, provide a visual representation of performance, highlighting gaps in care and identifying opportunities to improve outcomes.

Specialty-Specific Topic Areas

- Age-related Hearing Loss
- Allergic Rhinitis
- Bell's Palsy
- Dysphonia
- Early Oral Cavity Cancer
- Otitis Media with Effusion
- Tympanostomy Tubes
- Neurotology
- Rhinoplasty
