

September 24, 2019

President Donald Trump  
 The White House  
 1600 Pennsylvania Avenue, N.W.  
 Washington, DC 20500

Dear Mr. President:

Our organizations commend and fully support your plan to remove all non-tobacco flavored e-cigarettes from the market, including mint and menthol flavors. If this plan is swiftly and fully implemented, it will play a critical role in reversing the youth e-cigarette epidemic.

Data from the 2019 National Youth Tobacco Survey (NYTS) shows that the youth e-cigarette epidemic has gotten even worse in the past year. E-cigarette use among high school students rose from 20.8% in 2018 to 27.5% in 2019, meaning that more than 1 in 4 high schoolers use e-cigarettes. A total of 5 million U.S. kids now use e-cigarettes. This is a public health crisis.

Nearly all (97%) current youth e-cigarette users use flavored e-cigarettes and 70% use e-cigarettes “because they come in flavors I like.” We urge your Administration to act without delay to finalize and implement its plan to remove all flavored e-cigarettes from the market—both in retail stores and online.

We urge you to reject tobacco industry pleas to weaken your proposal. It is critical to issue the revised compliance policy as announced on September 11, which included a prohibition on all non-tobacco flavors, including mint and menthol. As the 2019 NYTS data shows, mint and menthol are just as appealing to youth as other e-cigarette flavors like fruit. The percentage of high school e-cigarette users who report using mint and menthol flavors rose to 63.9% in 2019, up from 51.2% in 2018 and 42.3% in 2017. Given the prevalence of mint and menthol flavors among youth e-cigarette users and the lack of evidence that these flavors play any role in helping adults quit smoking, there is no public health justification to exempt them from any policy proposal. If the goal is to remove the e-cigarettes that are most attractive to youth, any proposal that ignores mint and menthol flavors falls short.

We urge your Administration to issue and implement the final guidance policy on the timetable stated by Secretary Azar, who stated that the FDA would issue the final policy within weeks and enforce it 30 days later.

We must do everything we can to prevent e-cigarettes from becoming an on-ramp to nicotine addiction for a generation of youth. We strongly support your proposal to swiftly remove all non-tobacco flavored e-cigarettes from the marketplace and urge you to move forward to implement this proposal without delay.

Sincerely,

September 24, 2019

First Lady Melania Trump  
 The White House  
 1600 Pennsylvania Avenue, N.W.  
 Washington, DC 20500

Dear Mrs. Trump:

Our organizations thank you for raising the alarm about the epidemic of youth e-cigarette use in the United States and for your support of the Administration's strong plan and necessary action to remove all non-tobacco flavored e-cigarettes from the market, including mint and menthol flavors. We share your concern about the use of e-cigarettes among our nation's youth and support the proposed prohibition on the sale of flavored e-cigarettes. As you rightly noted, we must do everything we can to protect America's kids and prevent e-cigarettes from becoming an on-ramp to nicotine addiction for a generation of youth.

Data from the 2019 National Youth Tobacco Survey (NYTS) shows that the youth e-cigarette epidemic has gotten even worse in the past year. E-cigarette use among high school students rose from 20.8% in 2018 to 27.5% in 2019, meaning that more than 1 in 4 high schoolers use e-cigarettes. A total of 5 million U.S. kids now use e-cigarettes.

Nearly all (97%) current youth e-cigarette users use flavored e-cigarettes and 70% use e-cigarettes “because they come in flavors I like.” If the Administration’s plan is swiftly and fully implemented, it will play a critical role in reversing this public health crisis.

We also stress our strong support for fully implementing the compliance policy as announced on September 11, which included a prohibition on mint and menthol flavors. As the 2019 NYTS data shows, mint and menthol are just as appealing to youth as other e-cigarette flavors like fruit. The percentage of high school e-cigarette users who report using mint and menthol flavors rose to 63.8% in 2019, up from 51.2% in 2018 and 42.3% in 2017. Given the prevalence of mint and menthol flavors among youth e-cigarette users and the lack of evidence that these flavors play any role in helping adults quit smoking, there is no public health justification to exempt them from any policy proposal. If the goal is to remove the e-cigarettes that are most attractive to youth, any proposal that ignores mint and menthol flavors falls short.

We strongly support the proposed comprehensive prohibition on flavored e-cigarettes and thank you for helping to protect America’s kids from the unrelenting efforts of the tobacco industry to hook kids.

Sincerely,
