GUIDING BETTER ENT CARE

- Merit-Based Incentive Payment System (MIPS) Reporting
- Payer Value & Alternative Payment Models
- Maintenance of Certification
- FDA Product Surveillance
- Research
- Quality Measures Development
- Quality Improvement & Clinical Effectiveness

CURRENT BENEFITS
FUTURE BENEFITS
Reg-ent is an otolaryngology-specific clinical data registry focused on quality improvement and patient outcomes. Data is a critical component in today’s ever-changing healthcare environment; Reg-ent harnesses the power of data to guide the best ENT care. Invest in the future of your specialty and take the lead in furthering the quality, safety, and efficacy of otolaryngology care by joining Reg-ent today!

REG-ENT GUIDES THE BEST ENT CARE THROUGH:

**MERIT-BASED INCENTIVE PAYMENT SYSTEM (MIPS) REPORTING**
Using Reg-ent, participants can report all required MIPS performance categories, including Quality, Promoting Interoperability (PI), and Improvement Activities (IA).

**RESEARCH**
Reg-ent will serve as a national data repository of otolaryngology-specific data that may be mined for research purposes.

**QUALITY IMPROVEMENT AND CLINICAL EFFECTIVENESS**
Reg-ent will utilize longitudinal data to identify gaps in performance and gaps in care provided at both the individual practitioner and system levels.

**PAYER VALUE & ALTERNATIVE PAYMENT MODELS**
Reg-ent will affirm effectiveness and define quality of care provided, utilize data to more effectively work with public and private payers on quality patient care, and prepare for participation in virtual groups.

**QUALITY MEASURES DEVELOPMENT**
Reg-ent is actively engaged in measures development covering the depth and breadth of the specialties of otolaryngology–head and neck surgery.

**MAINTENANCE OF CERTIFICATION**
Reg-ent will have the potential to provide data to the American Board of Otolaryngology – Head and Neck Surgery (ABOHN) to satisfy MOC requirements.

**PRODUCT SURVEILLANCE**
Reg-ent will facilitate post-market surveillance for medical devices and drugs.

MAKE YOUR INVESTMENT IN THE FUTURE OF THE SPECIALTY

REG-ENT BENEFITS THE PRACTICE OF OTOLARYNGOLOGY BY:

- Safeguarding the role of otolaryngologist–head and neck surgeons in defining the best care
- Demonstrating the value of services provided by otolaryngologist–head and neck surgeons in all iterations of future payment models and providing the opportunity for participation in private payer quality programs
- Serving as the first national data repository of otolaryngology-specific data that may be mined for research purposes
- Helping define and develop otolaryngology-specific quality measures

YOUR REG-ENT DASHBOARD:

- Creates a visual representation of your data, providing benchmark comparison to peers within your practice and nationally
- Provides the tools to monitor your practice and the outcomes of your patients
- Streamlines reporting for all performance categories of MIPS, including Quality, Promoting Interoperability, and Improvement Activities

“Reg-ent is the single best investment for our future and the future of this specialty as a whole. Reg-ent serves to define quality for the specialty.”

-Lisa Ishii, MD, MHS | AAO-HNS/F Coordinator for Research and Quality (2014-2018)
REG-ENT IS SECURE
- Each participating practice retains ownership of its practice data and the AAO-HNSF retains ownership of the aggregate data in Reg-ent.
- All identifiable patient information is stored on a secure, HIPAA-compliant cloud-based server.
- All Reg-ent participants are assigned unique login credentials to allow access to Reg-ent through a secure website.
- All data extraction and upload activity is fully encrypted.

GETTING STARTED WITH REG-ENT
Reg-ent uses a Registry Practice Connector (RPC) to securely access, query, and transfer data from your EHR to the servers supporting Reg-ent. If your EHR data is in the cloud, or if you practice in a health system or academic medical center, Reg-ent will work with both the practice and the EHR vendor to push your practice data to the registry, which requires additional engagement from both the practice and the EHR vendor.

REG-ENT ASSURES DATA QUALITY
For both push and pull sites, active participation by the practice is required to assist with the data mapping refinement process and review of data performance on the practice’s Reg-ent dashboard. To ensure that the quality of the data in Reg-ent is complete, valid and reliable, FIGmd has a multistep process for data exploration, data yield analysis, and data accuracy. In addition, Reg-ent conducts quarterly randomized audits to review and verify the data in Reg-ent.

MEMBERSHIP
All otolaryngologists and allergists must be members of the AAO-HNS in order to participate in Reg-ent. Non-physician providers do not need to become members of the AAO-HNS to participate in Reg-ent.

FEE STRUCTURE
