

ASPS19: Pre-surgical discussion of motivations and outcomes for patients undergoing Rhinoplasty

High Priority: Yes; Communication and Care Coordination

Percentage of patients aged 15 years and older who had a rhinoplasty procedure and with whom motivation for surgery and outcome expectations were discussed and for whom the following information was documented:

1. Discussion of motivations and expectations*
2. Surgical goals were realistic and exclusion criteria were reviewed

Definitions: *Documentation of any of words motivation, expectation, realistic, or unrealistic AND one of the following terms or phrases will meet the measure:

- *Independent /Preference/Desire/Look like/Appearance*
- *Size: Big(ger), small(er)*
- *Shape: Straight, crooked, bent, hook, hump, bump, droop, flare, wide, thin, narrow, bulbous, pug, pointy, projection, rotation, flare, round, long(er), short(er)*
- *Proportion/Balance: Tip, bridge, overly-prominent nostrils/nostril asymmetry, change of appearance with smiling (pulling or widening), general asymmetry*
- *External shaming/Ridicule/Bullying/Advice/Critical/Tease(ing)*
- *Self-esteem/Self-conscious*
- *Facial Harmony/ gender characteristics/ ethnicity*
- *Function: Breathe/Breathing, Repair injury, Snoring, Olfaction, Recurrent infection, Altered sensation, Voice change*
- *Realistic/Unrealistic*

Denominator:

All patients aged 15 years and older who had a rhinoplasty procedure

Age > 15 years

AND

CPT® for Encounter:

30400, 30410, 30420, 30430, 30435, 30450, 30460, 30462, or 30465

Denominator Exclusions:

None

Denominator Exceptions:

None

Numerator:

Patients with whom motivation for surgery and expectations of outcomes were discussed and for whom the following information was documented:

1. Discussion of motivations and expectations*
2. Surgical goals were realistic and exclusion criteria were reviewed

Definitions: *Documentation of any words of motivation, expectation, realistic, or unrealistic AND one of the following terms or phrases will meet the measure:

Independent/Preference/Desire/Look like/Appearance

Size: Big(ger), small(er)

Shape: Straight, crooked, bent, hook, hump, bump, droop, flare, wide, thin, narrow, bulbous, pug, pointy, projection, rotation, flare, round, long(er), short(er)

Proportion/Balance: Tip, bridge, overly-prominent nostrils/nostril asymmetry, change of appearance with smiling (pulling or widening), general asymmetry

External shaming/Ridicule/Bullying/Advice/Critical/Tease(ing)

Self-esteem/Self-conscious

Facial Harmony/gender characteristics/ethnicity

Function: Breathe/Breathing, Repair injury, Snoring, Olfaction, Recurrent infection, Altered sensation, Voice change
Realistic/Unrealistic

Measure Classifications:

Measure Type: Process

National Quality Strategy (NQS) domain: Person and Caregiver Centered Experience and Outcomes

Meaningful Measure Area: Care is Personalized and Aligned with Patient's Goals

Calculation: 1st Performance Rate

Inverse Measure: No

Continuous Measure: No

Proportional Measure: Yes

Ratio Measure: No

Risk Adjusted: No
